Vol. VIII, No. 6

June 1964

MAY UNIFORM PRICE \$3.60

Dairy farmers will receive a uniform price of \$3.60 for May 1964 deliveries of Grade A milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order. The uniform price is based upon a butterfat test of 3.5 percent, and will be adjusted by a differential of 7 cents for each one tenth percent that tests vary above or below the 3.5 percent standard. The minimum price is subject to a 4 cent per hundredweight marketing service deduction, together with the authorized hauling charge. This price is 2 cents less than a computed uniform price of a year ago and is 13 cents less than the April 1964 uniform price.

PRODUCER RECEIPTS

May is the highest production month of the year, and this year is no exception. Daily average producer receipts are 4.8 percent higher than in April and .2 percent higher than a year ago, with 55 less producers on the market. The average daily herd production is an all time high of 970 pounds per day, or almost 113 gallons per day. This increase in producer receipts, and a 5 percent decrease in average daily sales, drops the Class I utilization down to 64.8%.

ORDER AMENDMENTS

A Recommended Decision has been issued May 26, 1964, on proposed amendments to Order No. 31. This Recommended Decision is in conjunction with a Recommended Decision for Chicago, which would transfer three townships in Lake County, Indiana, to the South Bend order. The South Bend order would have the marketing area expanded by five counties, namely: Kosciusko, Marshall, Starke, Porter, and Lake. The supply-demand adjustment would be deleted and the Chicago supply-demand adjustment used instead. Class II and Class III would be combined in one class and called Class II, and the Class II price would be based on the Wisconsin-Minnesota price series. The butterfat differential to producers would be a weighted average according to market utilization of Class I and Class II. The butterfat differentials would be .120 times Chicago butter price for Class I and .113 times Chicago butter price for Class II.

CLASS I PRICE

The Class I price for the June 1964 delivery period will be \$3.96 per hundredweight for 3.5 percent milk. The price was computed by adding \$0.90 per hundredweight to the basic formula price (\$3.12), minus the 6 cent supply-demand adjustment. The supply-demand adjustment for the July 1964 delivery period will be a minus 2 cents.
